

## Right. Let's get started!

First things first, plug your device in as soon as you can. Don't worry, if your policy hasn't started yet. We won't start to count your kilometres until your policy start date.

Your box may have come with an extension lead. This makes the device easier to fit in some cars depending on the make and model. No extension lead in the box? Then you shouldn't need one for your car.

Once you've plugged in your device an alert will automatically be sent to us. No need to even start your engine.

## So, where do I plug in my device?

The device plugs into your car's OBD socket. In most cars this is on the centre console, under the dash just above the pedals, or to the right of the steering wheel.

## Can't see the OBD socket?

You can check where the OBD socket is for your car's make and model on:

[www.wikiobd.co.uk](http://www.wikiobd.co.uk).

|                                       |                                                                                          |                                  |
|---------------------------------------|------------------------------------------------------------------------------------------|----------------------------------|
| 1 Click on the car section at the top |       | <input type="button" value="O"/> |
| 2 Select your car make e.g. Ford      |  FORD | <input type="button" value="O"/> |
| 3 Select your car model e.g. Fiesta   | FIESTA                                                                                   | <input type="button" value="O"/> |
| 4 Select your car version e.g. MK3    | MK3                                                                                      | <input type="button" value="O"/> |
| 5 Select the car year e.g. 2017       | 2017 > 2018                                                                              | <input type="button" value="O"/> |

## About Your Device

We have sent your policy documents to you by email. Make sure to give them a read.

This booklet contains important information about your device.

Your device must be fitted to your car at all times. Please note your policy will be cancelled if your device is not fitted within 7 working days of your cover starting.

If you are having your car serviced you may need to remove your device to enable access for your engineer.

Remember to replace the device, as soon as you can, when you pick up your car.

If you lose or damage your device there will be a charge of €120 to replace it.
